HomeChef Sydney - Website Build Specification

For AI Agent / Developer Implementation

PROJECT OVERVIEW

Build a simple 5-page website for a home-cooked meal subscription marketplace. The site connects customers with local chefs who deliver weekly meal sets.

Technology Stack: Softr.io + Airtable (recommended) OR static HTML/CSS/JS + Google Sheets
Timeline: 1-2 days **Core Function:** Lead capture and chef listings (manually operated backend)

SITE STRUCTURE

```
yourservice.com.au
├── / (Homepage - Browse Chefs)
├── /subscribe (Customer Subscription Form)
├── /become-a-chef (Chef Application Form)
├── /how-it-works (Explainer Page)
└── /about (About Us Page)
```

PAGE 1: HOMEPAGE (Customer Browse Chefs)

Header Section

Layout:

- Logo (left): "HomeChef Sydney" with simple icon
- Navigation (right): "How It Works" | "Become a Chef"
- Full-width hero section below navigation

Hero Content:

```
Headline: "Authentic home-cooked meals delivered weekly"
Subheading: "Subscribe to a local chef. Get 5 delicious meals. No cooking
required."
Service Area: "Currently serving: Newtown, Marrickville, Erskineville"

Trust Badges (icons with text):
✓ Real home cooking, not restaurant food
✓ New menus weekly
✓ Support local chefs in your community
```

Chef Cards Grid

Layout: CSS Grid, 2-3 columns on desktop, 1 column on mobile

Individual Chef Card HTML Structure:

```html
```

```html
<div class="chef-card">
  <img src="chef-photo.jpg" alt="Chef Priya" class="chef-photo">

  <div class="chef-header">
    <h3>Chef Priya</h3>
    <p class="cuisine-type">North Indian</p>
    <div class="rating">⭐ 4.8 <span class="review-count">(12 reviews)</span></div>
  </div>

  <p class="chef-bio">"My grandmother's recipes from Punjab. Everything made fresh t

  <div class="menu-section">
    <h4>THIS WEEK'S MENU (Apr 1-5)</h4>
    <ul class="menu-list">
      <li>🍛 Butter Chicken with Rice</li>
      <li>🥘 Dal Makhani</li>
      <li>🍚 Vegetable Biryani</li>
      <li>🥬 Palak Paneer</li>
      <li>🍮 Gulab Jamun (dessert)</li>
    </ul>
    <a href="#" class="view-photos">View Photos →</a>
  </div>

  <div class="card-footer">
    <div class="pricing">
      <span class="price">$75/week</span>
      <span class="meal-count">5 meals</span>
    </div>
    <p class="delivery-info">Delivers: Mon, Wed, Fri</p>
    <p class="availability">Available spots: 8/15</p>

    <a href="/subscribe?chef=priya" class="btn-primary">Subscribe to Chef Priya</a>
  </div>
</div>
```

Chef Card Specifications:

- Chef photo: 300x300px square, centered crop
- Rating display: Only show if chef has >3 reviews, otherwise show "New Chef" badge
- Menu items: Exactly 5 items with emoji icons
- View Photos: Opens lightbox/modal with 5 dish photos (600x400px each)
- Availability counter: Manual update by admin
- When fully booked: Button text changes to "Join Waitlist"

Footer

```html
<footer>
  <nav>
    <a href="/how-it-works">How It Works</a> |
    <a href="/become-a-chef">Become a Chef</a> |
    <a href="/about">About Us</a>
  </nav>
  <p>Contact: hello@homechef.com.au</p>
  <p>📍 Serving Newtown, Marrickville & Erskineville</p>
  <p>© 2025 HomeChef Sydney</p>
</footer>
```

PAGE 2: SUBSCRIPTION FORM (/subscribe)

URL Parameter

- Accept `?chef={chef_id}` to pre-fill chef selection
- Example: `/subscribe?chef=priya` auto-selects Chef Priya

Form Header (Dynamic)

```
You're subscribing to: Chef Priya
North Indian • $75/week
Week of Apr 1-5
```

Form Fields

HTML Form Structure:

```html
```

```html
<form id="subscribe-form" action="/submit-subscription" method="POST">
  <!-- Hidden field -->
  <input type="hidden" name="chef_id" value="priya">

  <!-- Terms Acceptance -->
  <label class="checkbox-label">
    <input type="checkbox" name="terms_accepted" required>
    I agree to weekly payments of $75 until I cancel
  </label>

  <button type="submit" class="btn-primary">Complete Subscription</button>

  <p class="terms-note">Cancel anytime. No commitment beyond the first week.</p>
</form>
```

Form Validation Requirements

- All fields marked with * are required
- Email: Must be valid email format
- Phone: Australian mobile format (04XX XXX XXX), auto-format on input
- Postcode: 4 digits, must start with 2
- Suburb: Must match dropdown options (service area only)
- Delivery notes: Max 200 characters
- Dietary restrictions: Max 300 characters
- Terms checkbox: Must be checked to submit

Success Message (After Form Submission)

```html
<div class="success-message">
  <h2>✓ Subscription Received!</h2>
  <p>We've sent payment instructions to your email.</p>
  <p>Chef Priya will contact you 24 hours before your first delivery.</p>
  <p>Questions? WhatsApp us: <a href="tel:04XXXXXXXX">04XX XXX XXX</a></p>
  <a href="/" class="btn-secondary">Back to Home</a>
</div>
```

Form Submission Behavior

Option A (Softr/Airtable):

- Form submits directly to Airtable
- Triggers email notification to admin
- Shows success message

Option B (Static HTML):

- Form submits to Google Forms webhook OR
- JavaScript POST to Google Apps Script endpoint
- Returns JSON response
- Show success message on client side

PAGE 3: CHEF APPLICATION (/become-a-chef)

Page Header

```html
<div class="hero-section">

```

Responsive Design

Mobile-First Breakpoints:

```
css
```

```
/* Mobile: default styles */
/* Tablet: 768px and up */
@media (min-width: 768px) {
  /* Chef cards: 2 columns */
}

/* Desktop: 1024px and up */
@media (min-width: 1024px) {
  /* Chef cards: 3 columns */
  /* Max content width: 1200px */
}
```

Mobile-Specific Requirements:

- All tap targets minimum 44x44px
- Phone numbers are click-to-call enabled: `<a href="tel:04XXXXXXXX">`
- Forms use native mobile inputs (type="tel", type="email")
- Chef cards stack vertically (1 column)
- Navigation converts to hamburger menu

Image Requirements

Chef Photos:

- Size: 300x300px
- Format: JPG or PNG
- Optimization: Max 200KB file size
- Style: Natural lighting, smiling, approachable

Dish Photos:

- Size: 600x400px (3:2 aspect ratio)
- Format: JPG
- Optimization: Max 300KB file size
- Style: Home kitchen aesthetic (NOT professional studio shots)

FUNCTIONAL REQUIREMENTS

Form Submission Endpoints

Customer Subscription Form:

- **Endpoint:** POST to Airtable API OR Google Sheets webhook
- **Response:** JSON with `{success: true}` or `{success: false, error: "message"}`
- **On Success:** Show success message div, hide form
- **On Error:** Display error message, keep form visible

Chef Application Form:

- **Endpoint:** POST to Airtable API OR Google Sheets webhook (with file upload support)
- **File Upload:** Use FormData for multipart/form-data
- **Response:** Same as subscription form

Email Notifications

Required Email Triggers:

1. New customer subscription → Email to admin
2. New chef application → Email to admin

Email Template (to be sent from backend):

```
Subject: New Subscription - [Customer Name]

Customer: [Name]
Email: [Email]
Phone: [Phone]
Chef: [Chef Name]
Start Week: [Date]
Delivery Address: [Full Address]
Dietary Restrictions: [Text or "None"]
Payment Method: [Bank Transfer or Stripe]

Analytics Tracking

Google Analytics Events to Track:

- Page views (all pages)
- Form submissions (successful)
- Form abandonment (started but not completed)
- Chef card clicks
- "View Photos" clicks
- CTA button clicks

Implementation:

```html
<!-- Add to <head> -->
<script async src="https://www.googletagmanager.com/gtag/js?id=G-XXXXXXXXXX"></scrip
<script>
  window.dataLayer = window.dataLayer || [];
  function gtag(){dataLayer.push(arguments);}
  gtag('js', new Date());
  gtag('config', 'G-XXXXXXXXXX');
</script>
```

ACCESSIBILITY REQUIREMENTS

- All images have descriptive alt text
- Form labels are properly associated with inputs (for= and id= match)
- Color contrast ratio minimum 4.5:1 for text
- Keyboard navigation works for all interactive elements
- Focus states are visible (outline on focus)
- ARIA labels for icon-only buttons
- Semantic HTML (header, nav, main, footer, section, article)

PERFORMANCE REQUIREMENTS

- First Contentful Paint: < 2 seconds
- Time to Interactive: < 3 seconds
- Total page size: < 2MB
- Image lazy loading for chef photos below the fold
- Minified CSS and JavaScript
- Font loading optimization (font-display: swap)

BROWSER COMPATIBILITY

Must support:

- Chrome (last 2 versions)
- Safari iOS (last 2 versions)

- Safari macOS (last 2 versions)
- Firefox (last 2 versions)
- Edge (last 2 versions)

Mobile browsers:

- iOS Safari 14+
- Chrome Android 90+

DEPLOYMENT NOTES

If using Softr + Airtable:

1. Build in Softr visual editor following this spec
2. Connect to Airtable database
3. Set up custom domain
4. Configure email notifications in Airtable automations

If using Static HTML:

1. Host on Netlify or Vercel (free tier)
2. Set up form submission to Google Apps Script endpoint
3. Configure custom domain
4. Set up SSL certificate (automatic on Netlify/Vercel)

Domain Setup:

- Register: homechefsydney.com.au (or similar .au domain)
- Configure DNS to point to hosting provider
- Enable HTTPS (SSL certificate)

Email Setup:

- Business email: hello@homechef.com.au
- Use Google Workspace ($6/month) OR
- Use email forwarding to personal Gmail

TESTING CHECKLIST

Before launch, test:

Forms:

- [ ] All required field validations work
- [ ] Phone number auto-formats correctly
- [ ] Form submits successfully
- [ ] Success message displays
- [ ] Admin receives email notification
- [ ] Data appears in Airtable/Google Sheets

Navigation:

- [ ] All internal links work
- [ ] External links open in new tab
- [ ] Mobile menu opens/closes
- [ ] Back button works correctly

Responsive:

- [ ] Test on iPhone (Safari)
- [ ] Test on Android (Chrome)
- [ ] Test on tablet
- [ ] Test on desktop (1920px width)

Content:

- [ ] All placeholder text replaced with real content
- [ ] All images load correctly
- [ ] No broken images or 404 errors
- [ ] Spelling and grammar checked

Performance:

- [ ] Run Google PageSpeed Insights (score > 80)
- [ ] Images are optimized
- [ ] No console errors in browser

DELIVERABLES

What the AI agent should provide:

1. **Fully functional website** (Softr project OR HTML/CSS/JS files)
2. **Airtable database template** OR **Google Sheets template** with:
    - Chefs table
    - Weekly Menus table
    - Customer Subscriptions table

    - Chef Applications table
3. **Form submission setup** (Airtable automations OR Google Apps Script)
4. **Email notification templates**
5. **README.md** with:
    - How to update chef menus
    - How to add new chefs
    - How to view customer submissions
    - How to configure email notifications

Timeline:

- Day 1: Build all 5 pages, set up database
- Day 2: Test forms, fix bugs, deploy

NOTES FOR AI AGENT

- This is an MVP - prioritize speed over perfection
- No user authentication required (forms are public)
- No payment processing integration yet (manual bank transfer only)
- Admin panel not required (manual updates via Airtable/Sheets)
- Focus on mobile-first design (70% of traffic expected from mobile)
- Use CDN-hosted libraries (no npm build process needed for static version)
- Keep it simple - every feature adds maintenance overhead

Out of Scope for MVP:

- User login/accounts
- Chef dashboard (self-service menu upload)
- Automated payment processing
- Recommendation algorithm
- Mobile app
- Advanced admin panel
- Email automation (beyond basic notifications)
- SMS notifications
- Delivery tracking
- Review/rating submission (done via Google Forms post-delivery)
